

## SERVLET

Two files required (Run in Eclipse, Tomcat server is also required)

1>student.html

2>first.java

Steps:

- File->new->Dynamic Web Project-> give name to project-> right click on project name->new->html-> give filename as student.html
- Right click on project name->new-> servlet-> give classname as first

To run

- Right click on student.html->run as->run on server->select Tomcat 7.0 to run.

**student.html**

```
<html>
<body>
<form method="post" action=first>
Enter Your Name
<input type=text name="t1">
<br>
Enter Your Address
<input type=text name="t2"> //Add more fields at time exam
<br>
<input type="submit" value="submit">
</form>
</body>
</html>
```

**first.java**

```
public class First extends HttpServlet {

    protected void doPost(HttpServletRequest request, HttpServletResponse response) throws
ServletException, IOException {

        PrintWriter pw=response.getWriter();
```

```
response.setContentType("text/html");

    String name=request.getParameter("t1");

    String addr=request.getParameter("t2");

    pw.println("Name is"+name);

    pw.println("Address is"+addr);

    pw.close();

    }

}
```
