PHP (Run on XAMPP server)

Two files

1> insert.html
2> index.php

Steps:->

1> Start ->programs->XAMPP->xampp control panel (check APACHE and MySQL has green tick and stop is at button) minimize this window

2> Open firefox->write in address bar->localhost/phpmyadmin -> create database and table here,also add at least 3 rows in it. (This is MYSQL)

>   *Database name- db*
>
>   *Table name- stud*
>
>   *Table have 2 columns name,password with data type varchar*

3> Goto My computer -> c:\ ->Xampp folder->htdoc folder-> in this folder create on folder named as php1(any name you can give) in this folder save two files ->insert.html and index.php (write code in these files using notepad)

To Run

1> Open firefox -> in address bar type->localhost\php1\insert.html

(php1-> is name of folder you had given)

insert.html

```
<html>
<body>
<form action="index.php" method="post">
Name: <input type="text" name="name"><br>
E-mail: <input type="text" name="address"><br>
<input type="submit">
</form>
</body>
</html>
```

index.php

```php
<?php
$conn=mysqli_connect('localhost','root','','userlogin');  //db is name of database created in mysql
phpmyadmin
if(!$conn)
{
die(mysqli_connect_error());
}
echo "connect successfully";
echo "<br>";
$tname= $_POST["name"];
$tadd=$_POST["password"];
$sql1="insert into user values ('$tname','$tadd')";
echo $sql1;
mysqli_query($conn,$sql1);

/*$sql= ' select * from user ' ;
$rs=mysqli_query($conn,$sql);
$nrows = mysqli_num_rows($rs);
if( $nrows > 0)
{
   while($row=mysqli_fetch_assoc($rs))
        {
        echo "Name: {$row['name']}<br>";
        echo "password: {$row['password']}<br>";
        echo "------------------------<br>";
        }
}*/
$sql = "SELECT * FROM user";

$result = $conn->query($sql);

if ($result->num_rows > 0)
{
        echo"<table align=center border=1><form>";
   // output data of each row
   while($row = $result->fetch_assoc()) {

                echo "<tr>"."<th class=data>"."Username: ".$row["username"]."<br><br><br><br>
."."Password: ".$row["password"]."<br><br><br><br>"."</th></tr><br>";
```

```php
        }
            echo "</table></form>";
} else {
    echo "0 results";
}

/*else
{
echo "Record not found";
}*/
mysqli_close($conn);

?>
```
